

COST AND SCHEDULE SAVINGS THROUGH DESIGN-BUILD DELIVERY

Today, the Federal/Public sector is the largest user of the design-build method of project delivery.

Why? Because an experienced design-build team provides the client with the unmatched ability to project costs and schedules, resulting in significant savings through the course of the project.

REES's firm structure and philosophy is built to drive the design-build process successfully. Through our early interactive client work sessions, REES and our design-build partner can identify potential cost savings early in the project and develop strategies for timely project completion. By providing the client with a fully integrated team of consultants and subcontractors, we are able to afford unmatched early project cost visibility.

REES has consistently delivered high quality design and coordinated design-build projects for the Federal Bureau of Prisons, the Internal Revenue Services, the Federal Bureau of Investigation, and the Social Security Administration.

To learn more about REES' design-build capabilities, please contact Ron Luman or Simon Harris.
