

CELEBRATE EARTH DAY WITH REES

Looking for an easy way to improve the environment? Just use less! Reduced consumption results in fewer carbon emissions, which are a primary cause of global climate change.

Recycling is a great way to minimize your impact on the environment. As part of our commitment to sustainability, REES recycles paper, cardboard, aluminum, glass, plastic, and batteries. We conservatively estimate that we recycle 160,000 pounds of paper each year. Additionally, by transitioning to paperless marketing, we save additional thousands of pounds from entering the waste stream in the first place.

You and your company can make a tremendous impact on the health of our planet. This year, make a commitment to small changes such as instituting a company recycling program. To learn more about REES' commitment to sustainability, or how we can help your organization "go green," please visit www.rees.com/sustainability or our "under construction" sustainability-focused website www.reeseearth.com.

HAPPY EARTH DAY!
