

## LOGAN MEDICAL CENTER CLINIC OPENS

The new Logan Medical Center Clinic is now open and serving the residents of Logan County. With an exterior design reflective of Guthrie, Oklahoma's rich history, the new building seamlessly blends the needs of a modern healthcare clinic and the city's rich architectural traditions.

The clinic's façade features intricate masonry work and stone archwork, with an elongated cast stone canopy that welcomes patients and visitors. Programmed to accommodate seven physicians, the clinic includes 21 exam rooms, two procedure rooms, a laboratory, and a high-volume X-ray room.

Designed to maximize efficiencies in a community hospital environment, the interior design of the clinic includes centrally located and easily accessible nursing, registration, and dictation areas. Additionally, the location of the doctor's offices, nurse stations, and patient rooms were carefully placed for ultimate patient care and after-hours operations.
