

REES EARTH LAUNCHES!

REES is proud to announce the official launch of REESEarth.com, a sustainability website offering a unique way to showcase sustainable design through our architecture and design practice. The site features projects that demonstrate sustainability, collected in a single location for ease of use in locating examples and learning about specific sustainable elements. There is no better way to learn than from real life examples!

The website includes not only project examples, but a breakdown of methods and materials that can be used to achieve sustainability. The website features links to other resources, including the USGBC, that will enhance one's knowledge of what it means to be a steward of the planet. In addition, the REES Earth website includes:

- From There to Here: A Brief History of Sustainability;
- An example of Construction Cost vs. Budget in the form of a project review;
- An Interactive Project Tour, featuring design elements of a LEED Silver project;

REES Earth. Feel the green!
