

REES SELECTED TO DESIGN CHINESE SENIOR LIVING COMMUNITY

REES has been selected to design China's first truly western style retirement community.

Located in the city of Zhangjiagang, a part of the world-famous Pearl Triangle, the project is being developed by the AoYong Group with the full support of the Zhangjiagang Economic Development Zone. The 20-story high-rise will feature 280 luxury apartments for Independent Living and 56 Memory and Skilled Nursing Care Units. In keeping with a hospitality model, each resident will become a member of the Club, which will offer daily meals, activities, wellness and fitness facilities and other amenities designed to help residents maintain an active, independent life.

"REES is please to be among the leaders in designing senior living communities where residents are offered a choice of lifestyles that cater to their wellness and well-being," said Dr. Frank W. Rees, Jr., AIA, LEED AP, Chairman and CEO of Rees Associates, Inc. "China is committed to the care of their aging population and REES is honored to be a part of this exciting venture."
